

Assignment Two

Group Work

Grade Allocation Table

Work Required	Percentage of Total
Assignment One	30% (complete)
Assignment Two Coding	30%
Assignment Two Documentation	20%
Assignment Two Presentation	20%

You will all receive the same mark – depending upon what your group achieved.

Assignment Two Coding

To complete the assignment, you must make the project work to the entirety of the requirements as outlined in the original brief (including emailing the invoice to the contact). Before you do this, your group needs to decide whose work they will be building upon, or if it is a combination of code, or a total fresh start.

Only one person from each group needs to submit the code for the group.

Assignment Two Documentation

For this part of the assignment, you will need to produce the following documentation:

1. Installation and running instructions – please make sure that you test these instructions by sending the code to a computer that does not already have the project. If these instructions don't work at my end, you will lose marks. You can assume that I have .net 5 core and the latest copy of visual study community.
2. User Guide – please make sure you test your user guide with someone who has never used your product before if possible. I need to be able to use the guide to use your application and pass the guide to the end user.
3. Project Plan – **Make** a small project plan that outlines how you will commit your time to this project, what tasks will be given to whom, etc. You can use online/offline software to do this, but make sure it is submittable in some format.

Only one person from each group needs to submit the documentation for the group.

Assignment Two Presentation

On the last week, you will be required to give a presentation that is a maximum of 10 minutes. I don't mind if this is in a video format, especially for online students, or if you do the work live, but it must include:

1. A six minute slideshow about your project and what you did.
2. A four minute product demonstration.

ALL group members must participate in this section of the assignment.
